Epson L120 Reset Free: Epson L120 Reset Download: Epson Setting Program Download: Epson, which ... L4>ta chá>ñn cá>ng ká>t ná>í cá>ša mĀ,y in Epson L1800: 4. 85/5.10 mb. Epson Stylus Photo L120. Resetting the Ink Level of an Epson L120 Resetting Ink Levels Epson L120 Resetting Epson L120 Ink Level Resetting the ink level of your Epson L120 inkjet printer Epson L120 Ink Level Reset Resetting Epson L120 Ink Level Resetting Ink Levels in Epson Printers There are two ways to reset the ink level in Epson printers. It is either at the hardware level, using a special button on the printer body, or the software method, using the Epson iProjection application. The first method for home printers is usually applicable to Epson L210, L310 printers. The second method for all other L-series printers. 1. Turn on the printer, press the "Reset Ink Level" button located on the side of the printer. 2. Press the / buttons to select: "Power off". Press the "Reset ink level" button. 4. 4. Press / to select "Yes". 5. Press / to select "On". 6. With the / buttons select "OK". 7. With the / buttons select: "Off". 8. Switch on the printer, press the "Reset ink level" button. 9. 9. Press / to select: "Power off". 10. Press the "Reset ink level" button 11. 11. Press / to select: "Yes". 12. Press / to select: "On". 13. With the / buttons select: "OK". 14. Press / to select "Off". 15. Turn off printer How to reset the counter on the Samsung ML-1610 printer Reset your Samsung ML-1610 printer to factory defaults so you can use the printer after resetting it without a cartridge. If you are not sure what version of firmware you have, look at the sticker stuck on the cover of the printer. The sticker shows the version of the firmware and the serial number on the left. If the firmware is not on your sticker, it means that the printer has already been flashed. In that case you will need to use another reset method. This method is very easy but might not work as the firmware has a status of "RPL" (reset read done) and therefore you have to do the following to remove it: 1. Run command line (cmd.exe) on your computer and type in a command: cd /d %windir%\system32\spool\printers\ 2. Call the context menu for the file printers\ and click "Delete". 3. Start the printer and check the result. The printer is now reset. This method is not intended to work with printers with the TWAIN function
